

Soft Red Winter • EARLY
AgriMAXX 511

high performance wheat

Maturity	Early
Head Type	Bearded
Height	Medium Short

- Impressive yields in the early maturity class
- Joints late to lessen freeze risk
- Very quick dry down in field for early harvest
- Top notch head scab resistance
- Low straw yield & easy double crop planting

Double crop farmers will love AgriMAXX 511. For an early maturity, AM 511 can yield. We've found it works across a variety of soil profiles, with best performance on average to better soils. At physiological maturity, AM 511 has a rapid dry down. We've seen AM 511 test within 1% moisture difference of the ultra earlyies! AM 511 is a moderate plant stature with finer straw, which lessens straw yield and helps improve double crop soybean stands. In high fertility and high yield environments, we encourage the use of Palisade for improved standability.
